CIL Education Data Dashboard | 2017

This data dashboard highlights school-based education data by School Demographics, Student Achievement, and Student Engagement. For the preparation of this dashboard, each RAACD Community Incubator Lead (CIL) reported the schools in which most of their neighborhood children and youth attend. This profile includes the schools and school-based data that the North Highlands & Foothill Farms CIL identified as their target schools in 2017. All data contained in this dashboard can be found through *DataQuest*, the California Department of Education's data reporting office. <http://data1.cde.ca.gov/dataquest/dataquest.asp>

Note: The four-year adjusted cohort forms the basis for calculating graduation rates, dropout rates, and other related rates. The cohort is the group of students that could potentially graduate during a four-year period (grade 9 through grade 12). The four-year adjusted cohort includes students who enter 9th grade for the first time in the initial year of the four-years used for the cohort. The four-year graduation rate is calculated by dividing the number of students in the four-year adjusted cohort who graduate in four years or less (with either a traditional high school diploma, an adult education high school diploma, or have passed the California High School Proficiency Exam) by the number of students who form the adjusted cohort for that graduating class.
